42 SWITZERLAND

JOB OFFER @42 Zürich

Pedagogical & Technical Lead (60%-100%)
2 hires, cross-trained, complementary focus

Workload: between 60%-100% (40h/week for 100%)
Location: Zürich (campus-based; some admin work can be done remotely depending on operational needs)
Start date: ideally **August 2026** (see timeline below)

Role at a glance

42 Zürich is part of the global 42 Network (50+ campuses). We offer tuition-free, practice-based, peer-to-peer learning in software development, AI and cybersecurity, open to people from all educational backgrounds.

We are hiring two Pedagogical & Technical Leads who will run campus operations together. Both roles cover technical and pedagogical/community responsibilities, so you can replace each other when needed. Each person will still have a primary focus (more technical vs. more pedagogical) to ensure depth and continuous improvement.

If you don't meet every single point (except German speaking) but you are excited by the mission and can grow into the role, we still encourage you to apply.

What you will do (shared responsibilities for both hires)

Pedagogy & inclusive community (both must be able):

- Ensure the deployment and daily operations of the pedagogy in Zürich in close collaboration with 42 Lausanne
- Get involved in pedagogical communications (AMA sessions, conferences, emailing, Slack) internally and towards external audiences
- Organize introductions/kickoffs, exams, rushes and other recurring pedagogical items
- Ensure student success through continuous interaction and support throughout the year
- Build a fair, safe, inclusive community. Conduct the discipline council and ensure fair treatment, non-discrimination, and that every student's voice is heard
- Supervise student requests (campus transfer, pedagogical delays, special personal issues)
- Collaborate with communications/corporate relations to organize and supervise hackathons and pedagogical events
- Be one of the speakers for admissions-related meetings

Technical (both must be able):

- Implement, maintain and develop the local IT infrastructure and a park of 150 computers (in coordination with 42 Switzerland Pedago & Tech Lead and the 42 Network IT team)
- Install and maintain workstations (hardware + operating systems)
- Run health checks and troubleshoot workstation hardware/software issues to ensure stability
- Ensure campus services: access controls (if applicable), Wi-Fi management, network stability

What we are looking for (skills-based)

Must-have (for both hires)

- **German:** professional working proficiency (spoken and written C1 Level or native). Swiss German is a plus.
- **English:** effective communication skills (meetings + documentation).
- Versatility and learning mindset: you enjoy building systems, improving processes, and learning fast.
- Strong troubleshooting and problem solving (technical and human situations).
- Respectful, clear communication, including de-escalation in tense moments (we value constructive feedback culture).
- Comfortable interacting with very diverse profiles (students, partners, team).

Technical competence (both must have a baseline)

Solid skills in development and in systems administration (2 years min.):

- Proficient in Python, knowledge of C/C++ programming, able to do shell scripting.
- Linux systems administration.
- IT equipment management (work laptops management, inventory...).
- Basic networking (routing, firewalling, switch configuration VLAN).

Pedagogical/community competence (both must have a baseline)

- Knowledge of 42 curriculum: the Piscine, the pedagogical model, the projects.
- Ability to support learners and groups with clarity, fairness and consistency.

About the team

- Christophe Wagnière is the CEO of 42 Switzerland and runs the 42 Lausanne campus since 2021, he is an entrepreneur in education and tech and will be one or two days a week on the different campus of 42 Lausanne and 42 Zürich.
- Cristina Bucher is the Managing Director of 42 Zürich, coming from IoT and intrapreneurship, she manages the fundraising of 42 Zürich since 2024 and oversees the deployment of 42 Zürich, the team management and the partners.
- Vincent Rey is Head of Pedagogy of 42 Switzerland, coming from France he is a software developer trained at 42 Paris who build 42 Lausanne in 2021.
- The teams of 42 Lausanne and 42 Zürich will work closely together, with cross-campus functional responsibilities (for example the Lead pedago is in Lausanne) and local management (Christophe in Lausanne and Cristina in Zürich). This will create a local autonomy and a national support.

42 SWITZERLAND

About Zürich

Zürich is one of Europe's most international and well-connected cities, an ideal place to build a modern tech learning ecosystem:

- **Thriving tech and innovation scene**, with many headquarters, scale-ups, and strong demand for digital talent.
- **High quality of life**: safe, efficient public transport, excellent healthcare and infrastructure.
- **Nature at your doorstep**: lake, river, and mountains for quick outdoor resets after intense campus days.
- **Global community**: multilingual, international networks and events, useful for partnerships and hiring visibility.

Benefits

- Impact: Play a key role in developing forward-looking education in Zürich.
- Culture: Work in a highly motivated team with a flat hierarchy, short decision-making processes and where you can bring in your ideas.
- Support: We support you for your installation in Zürich area.
- Network: Be part of a global network of 42 schools.

Application Process

- Send your application to **hr@42zurich.ch** by **18 April 2026**. Mail subject: Job application: Technical and Pedagogical Lead. Please include:
  - **CV**
  - **Motivation** Letter
  - **Required links:**
    - Your **GitHub profile link**
    - Your **42 login/profile link**
- Selected candidates meet Vincent Rey (on-line or in person). Discussions in English.
- Shortlist workshop in Zürich (in German) with the 42 Zürich team.

At the end, we will select 2 complementary persons that would address the different needs.

Start & onboarding plan (as originally stated):

- Start date: **1 August 2026**
- Optional onboarding academy in Paris: **29 June – 10 July 2026**
- Parallel onboarding support in Lausanne + building Zürich campus; Piscine planned in Lausanne and then Zürich (dates as stated in original).
